This absorbing and disciplinary book examines dress in a broad range of folk cultures from Turkey, Greece, and Slovakia to Norway, Latvia and Lithuania and others. The authors reveal the connection between folk dress and ancient myths, cults and ritual, as well as the communicative aspects of folk dress. It examines how an individual dressed in a certain way is placed within a community and also how a community is defined, whether it be of women, the village, the larger geographic area, or the nation. The intriguing connections between dress and the supernatural beliefs of agrarian communities, as well as the reinvention of such beliefs of agrarian communities as a part of nationalism is discussed. This book represents a significant contribution to the growing body of literature on the cultural meanings of dress, as well as to material culture, anthropology, folklore, art history, ethnohistory, and linguistics.

Traditional dress is a common phenomenon across much of Western Europe, often originating in elaborate practices for rural religious events. Yet despite its fundamentally local nature, traditional dress in various European regions developed along a similar trajectory, sometimes being transformed into political symbols and regional promotion for tourism, and always revealing the complexity of rural society in terms of religious divisions, class inequality and tension between the desires to protect tradition and embrace modernity. To better understand how traditional dress evolved in France and Germany from the 19th to 21st centuries, this book takes Alsace as its case study and in doing so illuminates broad experiences of modernity across rural Europe and answers overarching questions about regionalism and nationalism. Specifically, Sara Hume unpacks why Alsatian dress was adopted as a symbol of loyalty to France despite being closer in style to German dress practices. She explores the impact of political and geographical tensions on the appearance and function of traditional clothing, for example in Alsace's situation at the border between France and Germany and in its transformation from disputed territory into capital of a united Europe. Logically progressing chapters reveal how modernity did not drive out tradition in rural communities but rather led to processes of adaption, preservation and re-evaluation. Through a rich variety of primary sources including costumes, illustrations, political cartoons, legal documents and oral histories, Regional Dress sheds light on the little known and rarely documented experiences of rural Europeans. Its material culture approach to the study of regionalism is essential to students of traditional and folk dress history, European history and design history.

A fascinating exploration of an ancient system of beliefs and its links to the evolution of dance. From southern Greece to northern Russia, people have long believed in female spirits, bringers of fertility, who spend their nights and days dancing in the fields and forests. So appealing were these spirit-maidens that they also took up residence in nineteenth-century Romantic literature. Archaeologist and linguist by profession, folk dancer by avocation, Elizabeth Wayland Barber has sleuthed through ethnographic lore and archaeological reports of east and southeast Europe, translating enchanting folktales about these "dancing goddesses" as well as eyewitness accounts of traditional rituals--texts that offer new perspectives on dance in agrarian society. She then traces these goddesses and their dances back through the Romans and Greeks to the first farmers of Europe. Along the way, she locates the origins of many customs, including coloring Easter eggs and throwing rice at the bride. The result is a detective story like no other and a joyful reminder of the human need to dance.
