Our Mission; About Our School; Dr. Ira Pernick, Principal; Dr. Brad Fitzgerald, Class of 2023; Mr. David Miller, Class of 2024; Mr. Craig Weiss, Class of 2021

Excel Success One HSC Chemistry contains 2001-2014, 2015-2018 past HSC questions, and past 2019 HSC paper, with detailed answers written by experienced HSC markers, a topic index, a mark maximizer guide and a glossary of key verbs. This title helps you get the results you want by practising actual HSC papers and answering HSC-level questions.

Excel Success One HSC Chemistry 2021 Edition contains: Over 100 objective-response and short-answer questions from past HSC Papers 2001-2014 arranged into Module topics. Four sample HSC Examination papers with actual questions from the 2015-2018 HSC papers. All questions in these sample papers are on topics examinable in the new syllabus. Over half of each paper's questions are actual past HSC questions and the others are written for the new topics in the updated syllabus. Three Excel sample HSC Examination papers, written to the new syllabus and based on the new HSC exam format. The 2019 and 2020 HSC Examination papers. Answers to all questions with distribution of marks for each question.

Excel Success One HSC Chemistry contains 2001-2003 and 2008-2016 past HSC questions, with detailed answers written by experienced HSC markers, a Topic Index, a Mark Maximizer Guide and a Glossary of Key Verbs. This title helps you get the results you want by practising actual HSC papers and answering HSC-level questions.

EXCEL SUCCESS ONE HSC CHEMISTRY contains 2001-2003 and 2005-2013 past HSC questions, with detailed answers written by experienced HSC markers, a Topic Index, a Mark Maximizer Guide and a Glossary of Key Verbs. This title helps you get the results you want by practising actual HSC papers and answering HSC-level questions.

Gold Ore Processing: Project Development and Operations, Second Edition, brings together all the technical aspects relevant to modern gold ore processing, offering a practical perspective that is vital to the successful and responsible development, operation, and closure of any gold ore processing operation. This completely updated edition features coverage of established, newly implemented, and emerging technologies; updated case studies; and additional topics, including automated mineralogy and geometallurgy, cyanide code compliance, recovery of gold from e-waste, handling of gaseous emissions, mercury and arsenic, emerging non-cyanide leaching systems, hydro re-mining, water management, solid-liquid separation, and treatment of challenging ores such as double refractory carbonaceous sulfides. Outlining best practices in gold processing from a variety of perspectives, Gold Ore Processing: Project Development and Operations is a must-have reference for anyone working in the gold industry, including metallurgists, geologists, chemists, mining engineers, and many others. Includes several new chapters presenting established, newly implemented, and emerging technologies in gold ore processing. Covers all aspects of gold ore processing, from feasibility and development stages through environmentally responsible operations, to the rehabilitation stage. Offers a mineralogy-based approach to gold ore process flowsheet development that has application to multiple ore types.

The fourth edition of the highly regarded Conquering Chemistry series addresses the revised New South Wales Stage 6 Chemistry syllabus. Written by experienced author Roland Smith, the new fullcolour editions include a range of features that reflect the syllabus amendments, with a clear focus on chemical applications in the real world. Each book also includes a free student CD-ROM featuring the whole text in electronic format.

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

This volume contains the proceedings of the David Robertson Honorary Symposium: Celebrating the Megascale, held at the TMS 2014 Annual Meeting in San Diego, California. Dr. David G.C. Robertson, Professor Emeritus of Metallurgical Engineering at the Missouri University of Science and Technology, has devoted his career to the education of highly skilled metallurgical professionals and to the science of all types and sizes of metallurgical processes, particularly those involving molten metals. The volume contains more than 70 papers covering the important topics and issues in metallurgy today including papers as follows: keynote papers covering a tribute to Robertson, workforce skills needed in the profession going forward, copper smelting, ladle metallurgy, process metallurgy and resource efficiency, new flash iron making technology, ferro-alloy electric furnace smelting and on the role of bubbles in metallurgical processing operations. Topics covered in detail in this volume include ferro-alloys, non-ferrous metallurgy, iron and steel, modeling, education, and fundamentals.
