Venipuncture: Thoroughly cleanse the area with a Betadine® scrub or similar preparation followed by a rinse with 70% alcohol (ethanol may be used instead of isopropyl and is less toxic). Collect 1 to 10 mL of blood into a heparinized tube. Invert the tube several times to prevent coagulation. If a Vacutainer® is used, let off any remaining vacuum by inserting a hypodermic needle or loosening ...

We study the mechanisms of chromosome segregation in mammalian eggs. We are a young lab based in the beautiful city of Bristol. We are interested in the mechanisms that safeguard chromosome segregation during meiosis in mammals, including humans. We use techniques ranging from advanced live cell microscopy to biochemical reconstitution of cytoskeletal interactions in cell-free systems in order to understand a process that is crucial to the start of every human life, meiosis.
