Many of the secrets of life and consciousness can be discovered through Vedic Astrology. Mythology students will find it helpful in unlocking the astrological keys to the great archetypes of the psyche.
Most people know of Valhalla, the World-Tree and the gods of Norse mythology, or the strange hunts and voyages of the ancient Irish tales. Yet few people realise the significance of the similarities and contrasts between the religions of the pre-Christian people of north-western Europe. The Celts and Germans and Scandinavians had much in common in their religious practices and beliefs, and this is the first serious attempt that has been made to compare them. There are striking resemblances in their ideas about battle-goddesses and protective spirits, holy places, sacrificial rituals, divination and ideas about the Other World; and Myths and Symbols in Pagan Europe poses questions like: do such parallels go back to early times or are they owing to late Viking contact? Hilda Ellis Davidson has worked for many years on pre-Christian Scandinavian and Germanic religion and now compares them with the Celts from the background of previous studies, using evidence from archaeology, iconography, later literature and folklore, in a search for basic patterns which will add to our knowledge of the early peoples in Europe. Aimed at teachers and libraries but also accessible to students of history, religion and Celtic, Norse and German languages and cultures.
A timeless classic.
The Song of Eve is the song of all women. It's a chant sounding from centuries ago out of the mouths of the goddesses who gave women their strength and individuality. Lover, mother, priestess, creator/destroyer, virgin, muse - here lie the most powerful female images in a rich tapestry of words and pictures for the woman of today to discover and celebrate the goddess in herself.
Ancient Mesopotamia was a highly complex culture whose achievements included the invention of writing. This illustrated text offers a reference guide to Mesopotamian religion, mythology and magic between about 3000 BC and the advent of the Christian era. Gods, goddesses, demons, monsters, magic, myths, religious symbolism, rituals and the spiritual world are all discussed in alphabetical entries ranging from short accounts to extended essays.
First Princeton / Bollingen paperback printing, 1972; First Princeton Classics paperback printing, 2017 --Title page verso.
In Symbols of Sacred Science, Guénon, a master of precise, even 'mathematical' metaphysical exposition, reveals himself as a consummate exegete of myth and symbolism as well, superior in many ways to Mircea Eliade, and comparable perhaps only to his respected friend Ananda K. Coomaraswamy. This extraordinary text unveils the cosmological meanings of root symbols organized under such general headings as: The Center of the World, Cyclic Manifestation, Symbolic Weapons, Axial Symbolism and the Symbolism of Passage, The Symbolism of Building, and The Symbolism of the Heart. Far more than a simple catalogue of myths and symbols from many traditions, Symbols of the Sacred Science lays the foundation for a universal esoteric symbology. In this work, Guénon demonstrates the fundamental unity-across all cultures and ages-of the images with which the Absolute clothes itself in its cosmic self-revelation.
