Answers Full includes the post marketing studies including the drug's risk, benefits etc.2.

Describe the validation procedure? How would you perform the validation for TLG as well as analysis data set?Ans:-

Validation procedure is used to check the output of the SAS program, generated by the source programmer. In this process

Read Free Sas Clinical Interview Questions And

Answers Full
validator write the program and generate the output. If this output is same as the output generated by the SAS programmer's output then the program is considered to be valid. We can perform this validation for TLG by checking the output manually and for analysis data set it can be done using PROC COMPARE.3.

Read Free Sas Clinical Interview Questions And

Answers Full

How would you perform the validation for the listing, which has 400 pages? Ans:- It is not possible to perform the validation for the listing having 400 pages manually. To do this, we convert the listing in data sets by using PROC RTF and then after that we can compare it by using PROC COMPARE.4. Can you use PROC

Read Free Sas Clinical Interview Questions And

Answers Full

COMPARE to validate listings?

Why?Ans:- Yes, we can use PROC COMPARE to validate the listing because if there are many entries (pages) in the listings then it is not possible to check them manually. So in this condition we use PROC COMPARE to validate the listings.
