Despite rapid globalization within contemporary society and the seemingly obvious need for the study of foreign languages (FL) and cultures; recruitment to undergraduate FL degrees has dwindled, graduate programs have disappeared; and institutions have restructured independent language departments into mega-departments of languages, literatures, and cultures. At the same time, the FL and humanities disciplines have engaged in "soul-searching" exercises in an effort to understand and express a renewed sense of value for the study of foreign language and culture. As a result of these kinds of societal and disciplinary movements, FL programs, along with other educational sectors, are facing the increased need to engage with peripheral forces like accountability and accreditation, to express and ensure their value through outcomes assessment, and to begin to think, innovate, and behave programmatically. Key to enacting these changes systematically and effectively is heightened awareness of the importance of program evaluation, not only as a means to demonstrate how and why FL study is a valuable pursuit in today's world, but also as a process through which sound improvements can be made, participants can learn, and educational relevance can be sought. programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.
