The Coming Global Superstorm

No mere harbinger of an inevitable doomsday, The Coming Global Superstorm is instead a spirited call to action that offers a wealth of viable solutions to this mammoth challenge to humankind.

Over several months a potent succession of cold fronts will sweep across the world. Ever increasing in intensity and duration, damaging storms will batter the West Coast and spawn flooding, mudslides and severe, deadly tornadoes across the USA. Similar powerful storms will pummel Europe, sending millions streaming south in panic. Then meteorologists will issue their most severe warning yet: a storm that appears to be larger and more terrible than modern man has seen before. It will form a virtually nonstop hurricane of snow and ice that will begin to bury the Northern Hemisphere under an impenetrable sheet of frost. As weeks go by, the skies will remain turbulent and dark, and mankind will be thrust into its greatest peril - the global superstorm.

The end of the twentieth century saw some of the most violent weather on record. Scientific evidence suggests this trend marks the beginning of a climatological nightmare: a massive and unprecedented storm of unimaginable destructive force. What will trigger it? Global warming is about to cause the North Atlantic Current to drop to a more southerly route, causing cold Arctic air to barrel into overheated temperate zones. What will it be like? Sudden, dramatic changes in climate all over the world. Blizzard conditions. Sustained winds in excess of 100 miles per hour. The most severe winter storms in history. Shocking death rates. What can we do to stave it off? Plenty. Art Bell and Whitley Strieber, two of America's leading investigators of unexplained phenomena, offer a wealth of viable solutions in this impressively researched examination of modern environmental science and weather-related disaster. The Coming Global Superstorm is the most compelling and necessary book of the new millennium.

A best-selling author and a popular radio talk show host team up to reveal the pending ill-effects of human-made changes to the Arctic weather patterns, predicting dire consequences if global warming trends are not immediately halted. Reissue.

The year is 2025. Immense numbers of people swarm the globe. In countless, astonishing ways, technology has triumphed—but at a staggering cost. Starvation is rampant. City dwellers gasp for breath under blackened skies. And tottering on the brink of environmental collapse, the world may be ending ... It is a future that could well be ours. In their second shocking and fascinating portrait of America's possible destiny, Whitley Strieber and James Kunekka have again written a breathless thriller, a book that gives us an important warning and ultimately a message of hope.

Having read books like: The Weather Makers: How Man is Changing the Climate and What It Means for Life on Earth by Tim Flannery, An Inconvenient Truth by Al Gore, and The Coming Global Superstorm by Art Bell and Whitley Strieber, I let my imagination roam. Not only was I aghast as to what was happening now, but at what catastrophe will happen in the near future. We can only foretell the worst. The one thing you can be assured of is that the conditions will only get worse and the feedback will compound itself. My book talks about global warming, greenhouse gasses, and the increase of CO2 in the atmosphere. We must do something NOW!

The searing new novel from bestselling author Strieber explores the unthinkable but very real possibility of terrorists launching a nuclear weapon.

In the #1 New York Times bestselling tradition of Communion, Whitely Strieber returns with a terrifying novel of alien occupation We are not alone. Millions of people are confronting aliens that authorities say do not exist. Meet the Three Thieves, a group of Grays assigned to duty in a small Kentucky town. They have been preparing a child for generations. Innocent Conner Callaghan will face the ultimate terror as he struggles to understand who he has been bred to be, and what he must do to save humanity. Colonel Michael Morax strives to keep the secret of the Grays from the public for reasons so sinister, yet believable, that they read like truth. And Lauren Glass, government "empath" to the last surviving captive Gray, known only as B for Bob, has a unique ability to communicate with this captive Gray. But when B for Bob suddenly escapes the highly secure underground Air Force facility that he's been captive in for years, a frantic race begins, as the government must outmaneuver the Grays to keep the secret of their presence intact. The Grays is a mind-bending journey behind the curtain of secrecy that surrounds the subject of aliens, written by the field's great master, Whitley Strieber. If you've never so much as thought about the subject before, this book will make you think deeply, not only about the mystery of who the Grays are, but who exactly we are. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Intensely private radio personality Art Bell, who lives in the middle of the desert 65 miles west of Las Vegas--where he broadcasts his radio shows--finally comes forward with his fascinating autobiography.

It is time for the truth to be told... On July 2, 1947 something crashed in the desert outside of Roswell, New Mexico. An explosion of light and sound made the sheep wail, the chickens squawk, and the children scream. And then the ranchers heard a noise they thought could only have come from the devil himself. For forty years, Majestic Agency director Wilfred Stone helped the CIA pretend the landing never happened. Then his conscience got the better of him. This is the real story, told to reporter Nicholas A. Duke by the guilt-racked shell of the man who once worked tirelessly to cover it all up. It is a truth so terrifying that Whitley Strieber had to call it fiction. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
